CLIMATE CHAMBERS

Temperature and humidity chamber CH-7090

Microprocessor-controlled temperature and humidity chambers for food studies, accelerated ageing, genetics, viral research, environmental science, biochemistry and growth studies. From 72 to 976 litres, with refrigerated versions and special sizes.

Specifications

Model	**CH-7090**
Inner dimensions	70 × 90 × 60 cm
Capacity	378 L

Features

- Digital temperature control: ambient + 5 °C to 70 °C, ± 0.1 °C sensitivity
- Digital humidity control: 10 to 90 % RH
- T-304 stainless interior, magnetic seal
- Optional temperature and humidity recorder
- Optional computer interface and supervisory systems
- 120 V, 60 Hz power

Applications

- Stability studies
- Accelerated ageing of materials
- Plant growth and germination
- Food and environmental research
