CRUDE FIBER APPARATUS

Crude fiber apparatus EFC-6000

A fast, safe and accurate condensate-reflux apparatus for crude fiber determination. The sample undergoes a simulated digestion: heated in acid, washed and heated in alkali to isolate cellulose and crude-fiber residue. A procedure listed by AOAC.

Specifications

Model	**EFC-6000**
Places	6
Maximum power	2100 W

Features

- 6 heaters with individual infinite-type temperature control
- Stainless-steel condensers
- 600 mL tall-form beakers
- Requires cooling water and drain
- 127 V, 60 Hz power

Applications

- Crude fiber in feed and food
- Government and industrial laboratories
- Food-science teaching
