CONTROLLED ENVIRONMENT

Climate chambers

Microprocessor-controlled temperature and humidity chambers for food studies, accelerated ageing, genetics, viral research, environmental science, biochemistry and growth studies. From 72 to 976 litres, with refrigerated versions and special sizes.

Features

- Digital temperature control: ambient + 5 °C to 70 °C, ± 0.1 °C sensitivity
- Digital humidity control: 10 to 90 % RH
- T-304 stainless interior, magnetic seal
- Optional temperature and humidity recorder
- Optional computer interface and supervisory systems
- 120 V, 60 Hz power
